### **FOR IMMEDIATE RELEASE:**

#### **MJM Announces Strategic Partnership in New Zealand**

Sydney, Australia, July 2 – MJM, Inc., the global leader in insurance fraud mitigation and claims investigative services, is pleased to announce a new strategic partnership with Scope Investigations, a New Zealand investigations company.

In the partnership between MJM and Scope, Scope has been provided with state-of-the-art technology, including MJM CaseTrak, a web-based case management tool that offers clients 24/7 status reports of their assignments.

The partnership emphasises the commitment of both companies to help reduce the rising cost of insurance caused by insurance fraud and to provide high level field resources to the insurance marketplace.

MJM CaseTrak enhances and streamlines the process by which surveillance and investigative assignments are received, conducted and delivered to clients. All Scope clients can now monitor their investigations from their desktops with real-time access to their cases via a secure website through MJM CaseTrak.

“As MJM continues to expand our international presence and technological capabilities, we are excited about this partnership (Powered by MJM Technology),” said Kieran Milne, Managing Director of MJM Investigations (Australia) Ltd.

“I am very much looking forward to working closely with the owners of Scope, Hamish and Richard Kerr. They both share a commitment to the same core values that drive our organisation and are leaders in the New Zealand investigative industry.”

Hamish Kerr said the alliance between MJM and Scope marks a milestone in New Zealand’s insurance investigation marketplace.

“Our clients will not only be using the investigative industry’s leading technology, CaseTrak, but will receive better value for money through improved quality control.”

#### **About MJM, Inc.**

MJM Inc. is the international leader in providing a wide variety of investigative products and services to insurance carriers, self-insured corporations and third-party administrators. MJM provides quality field investigations, comprehensive SIU programs, strategic anti-fraud planning, innovative educational courses, integrated Internet-based technologies and professional consulting services.
